> Figures

Controlling (planning, organising, staffing and briefing to executive officer)

> Knowledge

Ability to recognise what is required of information.

Memberships

Gesellschaft für Immobilienwirtschaftliche Forschung e.V.

Bundesstiftung Baukultur e.V.

Profile

As a trained Industrial Engineer specialised in real estate controlling, it is my duty to transform features and benefits of projects into the commercial dimension "EURO". My characteristics are the linking of structured, analytical work with figures and an extensive, interdisciplinary general education. My nature is characterised by accuracy and proactivity. My strengths are to structure and drive projects.

Expected from 15 June 2011 I am looking for a permanent contract, preferably in an international environment again. As a flexible person, I am prepared to work anywhere in Germany. My hobbies are: socialising, politics and economics, slam poetry and modern art, football and tennis (in the past, anyway). Communication skills I have trained, such as a spokesman of an international student residence.

Seeking an exciting position that challenges, enthuses and inspires me.
